The *International Journal of Quantum Chemistry* (ISSN 0020-7608) is published monthly in six issues per volume plus symposia by John Wiley & Sons, Inc. Copyright © 1983 by John Wiley & Sons, Inc., 605 Third Avenue, New York, New York 10158. All rights reserved. Reproduction or translation of any part of this work beyond that permitted by Sections 107 or 108 of the United States Copyright Law without the permission of the copyright owner is unlawful. Second-class postage paid at New York, New York, and at additional mailing offices.

The code and the copyright notice appearing at the bottom of the first page of an article in this journal indicate the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients, on the condition that the copier pay for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. The per-copy fee for each article appears after the dollar sign and is to be paid through the Copyright Clearance Center, Inc., 21 Congress St., Salem, MA 01970. (The fee for articles published prior to 1978 is $1.00 per article.) This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective work, or for resale. Such permission requests and other permission inquiries should be addressed to the publisher.

Subscription price: $485.00 per year. Postage and handling outside U.S.A.: $48.00 by surface; $158.00 by air. Allow four weeks to process a change of address. Back numbers, microfilm, and microfiche are available for previous years. Request price list from publisher. **Postmaster:** Send address changes to Subscription Department, John Wiley & Sons, Inc., 605 Third Avenue, New York, New York 10158.

Inquiries concerning *advertising* should be forwarded either to the U.S. Advertising Representative, Daniel S. Lipner, Weston Media Associates, 37 Gray's Farm Road, Weston, CT 06883, or to the European Advertising Representative, Richard Webb, REW Space Sales, Apartment 1, 2 Gladstone Road, Kingston-upon-Thames, Surrey KT1 3HD, U.K.

Claims for undelivered copies will only be accepted after the following issue has been received. Please enclose mailing label. Missing copies will be supplied when losses have been sustained in transit and where reserve stock will permit.

The contents of this journal are indexed by the following: *Current Contents/Physical, Chemical and Earth Sciences; Science Citation Index; Chemical Abstracts;* and *Chemical Titles.*

Manuscripts should be submitted in triplicate to Professor P.-O. Löwdin, Quantum Chemistry Group, University of Uppsala, Box 518, S-75120, Uppsala 1, Sweden. All other correspondence should be addressed to the Journals Department, John Wiley & Sons, Inc., 605 Third Avenue, New York, New York 10158, U.S.A.

QUANTUM CHEMISTRY

Contents for Volume XXIV, 1983, Nos. 1–6

Issue No. 1, July 1983

Hydrogen-Like Atomic Orbitals: Addition and Expansion Theorems, Integrals
B. K. Novosadov 1

Molecular Basis Set Generation: Accurate Slater Basis Sets for LiH^- Ground and Excited State and Li_2^- Ground State
L. Adamowicz and E. A. McCullough, Jr. 19

Second- and Higher-Order Convergence in Linear and Nonlinear Multiconfigurational Hartree–Fock Theory
J. Olsen, P. Jørgensen, and D. L. Yeager 25

Lower Bounds to the Weizsäcker Correction in Statistical Models for the Na Atom with Shell Structure
P. Csavinszky and F. Vosman 61

Nonadiabatic Singer Polymal Wave Functions for Three-Particle Systems
R. D. Poshusta 65

Expectation Values and Density Matrices in the Coupled-Cluster Theory
H. G. Kümmel 79

Theoretical Study of Equilibrium Co—F Bond Distance of CoF_6^{n-} Complexes (n = 4,3, and 2) in Crystals
E. Miyoshi and H. Kashiwagi 85

Some Applications of the Gel'fand–Levitan Inverse Method in Atomic and Molecular Physics
M. Hron and M. Razavy 97

Quantum Model of Coherent X-Ray Diffraction: Extension to Bloch Orbitals
M. J. Goldberg and L. J. Massa 113

Letters to the Editor

The Canonical Function Approach and Diatomic Molecules
C. Leubner 127

On the Artificial Structure of the Water Dimer in the CNDO/2 Method
J. Lipiński 131

F. Anisimov, R. Dagys, and A. Sargautis 429

Unusual Random Walks
M. Randić, W. L. Woodworth, and A. Graovac 435

Stability Properties of Closed-Shell Restricted Hartree–Fock Solutions for Electronic Systems in the Framework of the Projected Hartree–Fock Method and Their Utilization
P. Karadakov and O. Castaño 453

Semiempirical MO Study of Pyruvate Substrate Behavior in the Active Center of Lactate Dehydrogenase
J. Krechl and J. Kuthan 479

Theoretical Study of the Interaction of Tetramethylammonium with Double-Stranded Oligonucleotides
N. Gresh and B. Pullman 491

Violations of the Noncrossing Rule Due to Special Symmetry and Alternance
C. Zhixing, H. Ruiyu, and Z. Yala 509

Continued Fractions for the Stirling Expansion Revisited
J. Čížek and E. R. Vrscay 521

Issue No. 6, December 1983

A Molecular Geometry Invariant Property of Energy Level Set Boundaries in Z Space
P. G. Mezey 523

Basis Set Quality. II. Information Theoretic Appraisal of Various s-Orbitals
A. M. Simas, A. J. Thakkar, and V. H. Smith, Jr. 527

On the Concept of "Partitions" in the Perturbation Theory of n-Electron Systems
H. M. Schmidt 551

Ordering of Kekulé Structures Using Nonadjacent Numbers
S. El-Basil and A. N. Osman 571

SCF and CI Studies of Hund's Rules for the Effects of Electronic Correlation and Delocalization. I
R. E. Brown and J. P. Colpa 593

Projected BCS Tamm–Dancoff Method for Molecular Electronic Structures
M. Takahashi and H. Fukutome 603

Electron Correlation Effects on Magnetic Properties of BH
M. Iwai and A. Saika 623

A Hermitean Reformulation of the Born–Oppenheimer Nonadiabatic Coupling Terms for Diatomic Molecules
J. Römelt 627

Calculation in k Space of Integrals Arising in the Theory of Van der Waals Forces. II. Formulas for Arbitrary Atoms
K. Ishida 633

Shaping the Density to Fit One-Electron Properties: Constrained RHF Calculations on N_2, FH, CO, and LiH
G. D. Zeiss and M. A. Whitehead 651

Ab Initio Calculation of the Heptamer $(NH_3)_7$ as a Reasonable Starting Point for a Description of the Ammonia Crystal
J. Bridet, S. Fliszár, S. Odiot, and R. Pick 687

A Possible Interpretation of Atomic Valency as a Spontaneously Broken Symmetry Response
R. F. Prat 697

Perturbation Theory and Electron Correlation in Extended Systems: Cyclic Polyene Model
M. Takahashi, J. Paldus, and J. Čížek 707

On the Sanibel Coefficients in the Expansion of Spin-Projected Slater Determinants
P-O. Löwdin 729

Analysis of Bonding Properties in Molecular Ground and Excited States by a Cohen-Type Bond Order
B. Dick and H-J. Freund 747

Ab Initio Molecular Fragment Calculations with Pseudopotentials: Model Peptide Studies
R. Gáspár, Jr. and R. Gáspár 767
